## Basics of Supply Chain Management

Explore the basic concepts in managing the flow of materials in a supply chain. In the Basics, you get a complete overview of material flow, from internal and external suppliers to and from your organization. Topics include:

- ✓ Elements of the Supply Chain
- ✓ Just-in-Time (JIT)
- ✓ Total Quality Management (TQM)
- ✓ Manufacturing Resources Planning (MRP II)
- ✓ Demand Planning
- ✓ Capacity Management

### Purpose

Workshops are arranged by the Chapter, based upon surveys and feedback from the local membership. They are intended to help in honing industry-related skills, aid in self-development, and enhance career opportunities. By participating in Workshops, individuals are also preparing for APICS Certifications such as Certified in Production Inventory Management (CPIM) and Certified in Integrated Resources (CIRM). This material is best suited to people with either academic or on-the-job experience. They are not introductory workshops and are intended for people with some background in Production and Inventory Control.

### Registration

CPIM Workshops are now offered in cooperation with the Community College Workforce Alliance (CCWA) a joint partnership between J. Sargeant Reynolds and John Tyler Community Colleges.

### Payment

For registration, payment and other administrative course details please either

Contact CCWA's Open Enrollment Training Specialist **Sandra** at (804) 523-2292
